

■ LH-153系列压力传感器

特点和用途:

微差压传感器和变送器采用美国先进的硅压阻技术与数字补偿技术。全范围进行温度与线性补偿。保证了产品的可靠性。

广泛应用于电力、暖通行业、工业窑炉等风压测量领域

Features & Applications:

EX904 pressure transducer and transmitter perform full scale temperature and linearity compensation with advanced technique and digital compensation technique, which guarantee the units' reliability.

Widely used in electricity, heating industry, industry boiler for wind pressure measuring.

量程/Rated Load: 0 ~ 350 bar

EX905A 平膜压力，用于食品等需要洁净度高的场合。
EX905A Flat Film Pressure Transducer, mainly used for food industry and other high degree cleanliness place.

EX905B 数显压力变送器，隔爆外壳。
EX905B Digital Pressure Transmitter, explosion-proof shell

EX905C 数显压力变送器，隔爆外壳。
EX905C Digital Pressure Transmitter, explosion-proof shell

EX905D 压力开关，上下限任意设定
EX905D Pressure Switch, Arbitrarily set upper and lower limits
